**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 12, 2003 has been entered.

***Response to Amendment***

Applicant's arguments filed May 12, 2003, have been fully considered but they are not deemed to be persuasive.

Applicant argues that Bilton does not disclose a connection channel directed tangentially to the direction of the circulation of the operating medium and does not disclose a connection channel having a straight line progression free of directional change. Applicant is mistaken. Bilton shows the connection channel (above the number 7), having two portions. The outer portion is directed radially, whereas the inner portion is essentially a groove along the inner wall of the pump. This groove is tangential to the circulation of the operating medium. The outer portion along with a corresponding portion of the inner portion, is a straight line progression free of directional change.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 102***

Claims 16-22, 27 and 28 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Bilton. Concerning claims 18 and 19, the housing of Bilton is directly connected to one of the pump and turbine wheels, and indirectly connected to the other of the pump and turbine wheels through the one of the pump and turbine wheels. Since "at least indirectly connected" is understood to include directly connected, Bilton each meet the limitations of claims 18 and 19.

**Conclusion**

Claims 23, 25, 26, 29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
